

Titan 48' 3-Axle Aluminum THINWALL™ Walking Floor Trailer

CUSTOM BUILT FOR:

Terry Devos
Langton, Ontario

Terry Devos operates a small fleet of walking-floor trailers in southwestern Ontario. He hauls wood chips and garden mulch for nurseries in New York and Pennsylvania, then comes home loaded with up to 33 metric tons (72,000 lb) of corn and feed. Devos started his business with a single trailer and now runs four units in total.

Devos says "The Titan trailer is strong and straight and it lasts longer. It holds up to the twisting when you go off-road onto the fields. Other trailers can't take the weight."

"The Titan sidewalls are very rugged. I have seen other brands of trailers come into our yard with everything from patches on sidewalls, loose rivets to bowed sidewalls. With my oldest Titan, 6 years in service, I can acid wash it and it comes up like new."

"From the extruded sidewalls to the stainless hydraulic lines, it is a low maintenance trailer with great resale (try and find a used one for sale)."

"Every one I buy is lighter than the one before and just as strong. Titan figured out what works."

JOB PROFILE

- maximum cubic capacity for wood chips plus maximum weight capacity for grain and wheat short
- stresses of off-road delivery and pick-up sites demand high strength and resilience under heavy loading
- high-capacity grain loads require heavy permits on U.S. roads
- small fleet operation means downtime must be minimized to keep all equipment on the road earning every day

KEY FEATURES

- original THINWALL horizontal hollow-core extruded sidewalls
- Hendrickson lift axle
- KEITH® WALKING FLOOR® unloader
- all-aluminum construction

Strength Through Innovation
