

Titan 48' 5-Axle Aluminum THINWALL™ Walking Floor Trailer

CUSTOM BUILT FOR: *Gro-Bark Ontario Ltd.*

Waterloo, Ontario

Gro-Bark Ontario is a leading producer of bark mulches and compost used by landscape and nursery operations. Gro-Bark operations cover a widespread territory, collecting materials from remote northern lumber mills, delivering it to regional processing plants, then driving the finished product to consumer markets in the south.

According to President Bill McKague, "We are in the trucking business as much as the bark business. Our routes can be up to 9 hours long one way over hilly roads, and the trailers often return empty. So transportation is a major factor in our product cost."

As a result, McKague keeps an eye out for useful innovations. In 1982, his fleet was the first in Ontario with a KEITH® WALKING FLOOR® system. In 1998, Gro-Bark bought its first Titan trailer and every new trailer since then has been a Titan.

McKague and Titan continue to work together on improvements. "When you want a door in front or a different type of tarp, you don't want to hear, 'Oh, we can't do that.'" Titan says, 'let's see what we can do'. They want to know why you need it and to talk about how it can be done. Then they stand behind it."

JOB PROFILE

- up to 130 cubic yards capacity for payloads up to 42 metric tons
- low total cost of ownership required to keep product cost competitive
- high fuel efficiency for long routes and back hauls
- easy access for cleaning and maintenance

KEY FEATURES

- original THINWALL horizontal hollow-core extruded sidewalls
- Front access door
- KEITH® WALKING FLOOR® unloader
- all-aluminum and stainless steel construction

Strength Through Innovation
