

Titan 48' 6-Axle Aluminum THINWALL™ Walking Floor Trailer

CUSTOM BUILT FOR:

Preferred Transport

Chatham, Ontario

Preferred Transport has been hauling for Ontario's agriculture markets for 40 years. Still a family-owned business, the fleet has grown to 55 power units and 150 trailers.

In Ontario's heartland, cross-border routes are a routine part of business. The Preferred trailer is designed to maximize loads throughout Ontario, Michigan and Quebec. Typically, the trailer is max'd out to 90,000 lbs. with locally grown corn, beans, wheat and sugar beets or with wood chips and fertilizer.

From his experience with Titan dump trailers, President Al McCully knew that his 10 new THINWALL

units would deliver a durable, low maintenance solution to his specific needs "Titan worked to the fullest of their engineering capability to find a nice balance for meeting different load regulations. They are excellent to work with in designing the trailer and meeting delivery schedules."

"This trailer is very versatile – it carries as much as my trains do, anywhere we go. When it goes onto farms, the liftable rear axle let's it pivot on the centre axles to maneuver."

"Drivers like these trailers, too – you'd have to pull them out of their dying hands to make them switch!"

JOB PROFILE

- agricultural bulk commodities require maximum gross weight capacity
- axle configuration to suit load limits in varied jurisdictions
- off-road strength and handling to service farm customers
- low maintenance requirements to minimize operating costs

KEY FEATURES

- original THINWALL horizontal hollow-core extruded sidewalls
- custom-engineered 6-axle configuration
- liftable rear axle
- KEITH® WALKING FLOOR® unloader
- all-aluminum and stainless steel construction

Strength Through Innovation
