

Titan 53' Tri-Axle THINWALL™ Walking Floor Trailer

CUSTOM BUILT FOR:

Valley Pulp & Sawdust Carriers Ltd. **Abbotsford, B.C.**

Neil and Rita Klassen had already been trucking in the lower mainland of B.C. for almost 20 years when they first started to add live floor trailers to their fleet in the early 1980s. They had seen an opportunity to stockpile and deliver sawdust, shavings and firewood to farms in the Matsqui Village and surrounding areas. To supply the business, the Klassens went into long distance trucking to haul their stock materials from a number of major mills.

The enterprise grew into a successful family business: from playgrounds to stables to garden centres, Valley Pulp and Sawdust Carriers Ltd. is a major regional supplier of widely varied pulp and wood products.

Mountainous roads and hard winters call for special equipment. Neil Klassen says "When it came time to replace some of the older trailers, we looked long and hard before going with the Titan THINWALL. The trailer is light, super tough and can do any job we put it on." His fleet reflects a wide range of tasks. Along with his triaxle Titan trailers, he runs a special-duty quad-axle and 29 ft. unit for local routes.

Whatever the differences in the job, what they have in common is THINWALL bodies and Titan quality.

JOB PROFILE

- high bulk capacity and low weight to maximize payloads
- sure tracking and cornering for easy handling on mountain roads
- maximum fuel efficiency for long routes and returns
- low maintenance and long lifecycle for low operating costs

KEY FEATURES

- original THINWALL horizontal extruded aluminum sidewalls
- hollow-core panels help insulate loads against freeze-up
- KEITH® WALKING FLOOR® self unloading system
- all-aluminum and stainless steel

Strength Through Innovation
